

Session 7

Title: Business Office Crime Scene - Forensics

Description: A fun and lighthearted *Crime Scene Investigator's* approach to back office operations and the evidence that might just prove a case that your payroll department and/or human resources department may not fair too well in front of a "jury." This session will include case studies and forensics as well as an "autopsy of the scene" to bring out the closet investigator in all of us. While this session will be fun-packed, the end result should cause each business professional to take a sharper look at their day-to-day operations.
